Note On days when the Calendar Grid, Calendar Collector, and Days in School are not featured in an activity, the class will update them together. Update procedures are described at the beginning of each workout write-up.

Calendar Grid – Share predictions about and post the day's marker, say and write the date, update models, and update the Calendar Grid Observations Chart.

Calendar Collector – Spin the spinner and add coins to the graph. Clear the graph at the beginning of each week.

Days in School – Make an X on the grid, then count and record the number of days.
