Note On days when the Calendar Grid, Calendar Collector, and Days in School are not featured in an activity, the class will update them together. Update procedures are described at the beginning of each workout write-up. Summaries of the update procedures appear below.

Calendar Grid – Sing the Days of the Week Song, make predictions about and post the day's marker, and share observations about the marker.

Calendar Collector – Spin the spinner, pull the designated number of cubes out of the mystery container, sort them by color, count and compare the two groups, and add them to the pocket for the week.

Days in School – Add a dot to the ten-frame and a link to the chain, and have the students figure out how many more are needed in one of the collections to make 10. Count all the dots and links collected so far, and record the result on the Classroom Number Line.
