Numeral Cards, Part 1 & Game Number Cards

Game Number Cards Make 3 copies of pages C2–C3 per student pair; consider using a different color for each set so decks are easy to keep separate. You'll remove some cards from each deck for certain activities.

Numeral Cards Make 1 copy of each page C2–C14. You need only one set of Numeral Cards, 1 card per number.

The Number Cards in Bridges in Mathematics and Number Corner kits may be used in place of cards 0–10 of this set. The Number Line Display Cards in kindergarten and grade 1 kits may be used in place of the larger numbers.

Ten-Frame Dot Cards (five-wise) page 1 of 2

Available in Bridges in Mathematics and Number Corner kits for kindergarten, and in Bridges in Mathematics kits for grade 1. You will need 2 copies of these pages to make each 22-card deck. Each pair of students needs 1 deck of 22 cards.
